

## Резюме: Уткин Юрий Николаевич

---

### Адрес

Федеральное государственное  
бюджетное учреждение науки  
Институт биоорганической химии им.  
академиков М.М. Шемякина и Ю.А.  
Овчинникова Российской академии  
наук, Москва, Россия

### Контакты

[utkin@ibch.ru](mailto:utkin@ibch.ru)  
<https://www.ibch.ru/users/190>

---

### Работа в ИБХ

2017–наст.вр.                                      Главный научный сотрудник

---

### Членство в советах и комиссиях ИБХ

Диссертационный совет

Ученый совет

---

### Награды

2014    Премия имени Л.С. Лахири              За заслуги в исследованиях природных ядов и токсинов

---

### Научные интересы

Научные интересы Ю.Н.Уткина лежат в области исследования ядов животных, включая поиск в ядах, выделение и изучение биологической активности белков с новыми фармакологическими свойствами. Основное направление исследований – полипептидные соединения, взаимодействующие с Cys-петельными рецепторами.

### Членство в сообществах

Член

международного общества токсикологии, европейского нейрохимического общества

---

### Степени и звания

Доктор наук (Химические науки, 02.00.10 — Биоорганическая химия)

---

### Гранты и проекты

2024–     [Пептидные и белковые соединения на основе структур змеиных токсинов как перспективные](#)  
наст.вр. [средства для коррекции патологий сердечно-сосудистой системы](#)

2021–     [Белки и пептиды из ядов змей, влияющие на сердечно-сосудистую систему –](#)  
2023     [фундаментальная основа новых кардиопротекторных и гипотензивных препаратов.](#)

2021–     [Вьет: Соединения с антипротозойной активностью из ядов животных и растений Вьетнама и](#)  
2022     [России](#)

2018–     [Дизинтегрины яда гадюк как модуляторы активности интегринов в процессах пролиферации](#)  
2019     [опухолевых клеток и агрегации тромбоцитов](#)

2019–     [Применение наноматериалов для повышения терапевтического потенциала пептидов и белков](#)  
2020     [животных ядов](#)
